Bow M - Absorber

The Bow range is a new design born of the collaboration between Jan Morel and Artnovion.
Bow is an elegant balance between simplicity and futuristic design. Avaliable in 3 sizes, all crafted from premium fabrics and quality wood, filled with high performance acoustic foam. The Bow is available in 3 different sizes.
Combining the 3 different sizes of Bow creates distinct, unique designs and diffusion patterns.
Each Bow has a solid wooden shell, forming a carefully calibrated semi-circular diffuser, with dual lateral closed cavities packed with high performance acoustic foam. The Bow has a further central Helmholtz cavity extending the mid-range frequency absorption, for an overall balanced mid-high frequency hybrid absorber with an outstanding geometric diffusion.

The Bow can be installed on walls or ceilings, hung on screws by means of a discreet imbedded backboard. It can also be installed directly through the front of the panel, concealed behind removable side-foam.

Available in a selection of 10 wood and 10 fabric finishes.

Features

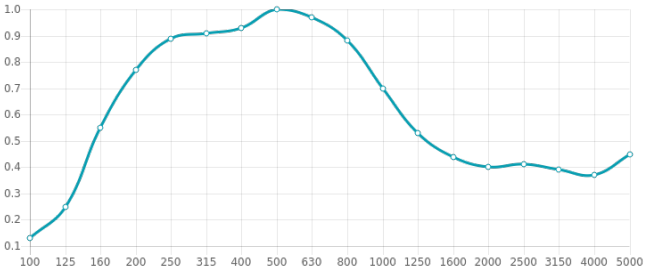

Type:
Hybrid Absorber

Recommended for:
Studios | Recording rooms

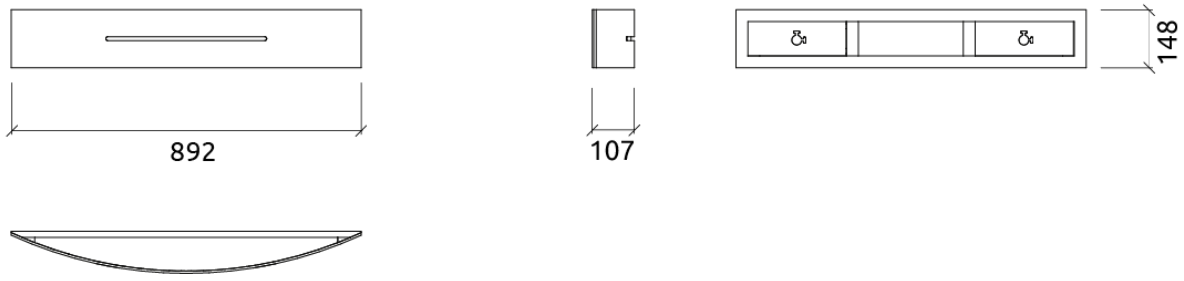

Absorption Range:
160 Hz to 4000 Hz

Acoustic Class:
D | (αw) = 0,5

Performance

Dimensions

892x148x107mm | 2.4 Kg
