

Olympus Microphone Shield

Mobile Kits

Olympus Microphone Shield is a curved isolation screen for microphones that drastically reduces first reflections and removes the general room effect from your recordings.

Designed and handcrafted in northern Portugal, this premium product features a natural wood finish. It consists of vertical slats with carefully calculated spacing to ensure transparency to the microphone's frequency response. With acoustic absorption features and an adjustable microphone clamp, Olympus is a portable, high-performance solution and is available in a selection of beautiful finishes. Olympus features a modular design optimised for transport, along with an easy mounting process and an adjustable mounting bracket. Olympus is prepared for both EU and USA microphone sizes.
