

Aura Tile - SQR

Aura Tile is designed for environments that require a discreet, durable, high-performance solution. Aura is designed to have the maximum effect as possible with minimum interference in terms of design and practicality.

The most common ocean pollution, PET plastic bottles, can be recycled into a hard wearing flexible acoustic material with exceptional performance. Aura is made from a 100% recyclable high-performance PET core, available in a range of fabric finishes.

Aura Tile can be used as drop ceiling tiles, or installed on walls and ceilings using standard panel installation systems or adhesive.

Aura Tile is available in three sizes, and in two different thickness': 30mm for more discreet applications, and 50mm when high performance is required.
