

Andes - Absorber

Andes Absorber was designed to control noise, sound reflections and excessive reverberation, in a decorative manner. Manufactured with premium materials and carefully wrapped with acoustic fabric, this product has an outstanding performance from mid to high frequencies.

The innovative design of our rear panels' air cavities provides maximum absorption surface and extra absorption coefficient efficiency, smoothing the absorption frequency spectrum.

The innovative frame design confers precise dimensions to each panel that allows for perfectly aligned assembly.

Available in standard market furniture grade fire rate, appropriate for home use applications, compliant with all domestic level fire grades; and Fire Rate + fire resistance, compliant with entry-level fire resistance, certified under specific European and American regulations.
