

Siena Surface 27

Surface panels are the perfect solution to treat large reflective surfaces that cause interfering reflections and excessive reverberation, which can disturb work environments, meeting and gathering areas, music quality, and speech intelligibility. Easy and quick to install, Surface panels are efficient absorption panels with 2D patterns that, when combined with other panels from our range, create a mesmerising effect. This product line allows for a continuous aesthetic across wide areas, with each panel featuring an acoustic veil that enables integration with the specific requirements of your project. Our large-scale panels make it possible to seamlessly incorporate acoustics into the building of your space, providing a practical and efficient solution.
