

Kea K 27

Kea K is a reliable and efficient acoustic panel, designed to perform in large spaces like auditoriums, concert halls, and arenas. Its perforations, with varying diameters, are calibrated to target a wider range of frequencies, guaranteeing absorption where it's needed most.

The larger panel size and simple fixing system make it easy to install and ideal for covering big areas. Its perforation pattern allows for a seamless, continuous design across multiple panels, creating a clean and uniform look in any space.
