Mobile Home Office Kit
Mobile Kits

Mobile Home Office Kit is composed by 4 Mobile Wall, each with 3 Helen Absorber Panels.

The Mobile Home Office Kit consists of 4 mobile walls equipped with our high-performance acoustic absorbers. The kit can reduce the room's reverberation time and lower background noise, giving you more privacy and creating a buffer from the rest of the room or house.

This sort of environment not only benefits your productivity and focus but also improves sound quality and voice intelligibility in webinars or web meetings, for you and for the rest of your team.
