Orion Mobile Bass Trap Kit
Mobile Kits

Orion Mobile Wall Kit is composed by 1 Mobile Wall, with 3 Orion Bass Trap Corner

Artnovion's new Mobile Bass Trap Kit is the perfect accessory to tame your studio's low end without the need for screwing or glueing anything to its surfaces. This is a versatile freestanding solution for home and professional studios that is available in both 2 and 3 stacked units of Bass Trap Corner.
This method of fixing our panels allows them to be placed in any high-pressure area in the room, and also enables them to be moved at any time and to any location.

The Corner Bass Trap is composed of 2 independent sections- 1 sealed volume equipped with independent, tuneable diaphragmatic membranes (TPDA), and an additional acoustic core packed with a high-performance porous absorber (VABT). This configuration is designed to bring you the best performance, with pressure and velocity sensitive cores exposed to the correct modal areas.
