

FixArt Foam Fixing System

Artnovion FixArt Foam brings versatile solutions to panel mounting. With the customer's needs in focus, we developed a reliable, simple, universal system to install panels.

Engineered for foam absorbers like Agad, Thor, and Athos F, FixArt Foam serves as a bridge between chemical and mechanical interfaces. It is designed to preserve your walls while offering a robust alternative to adhering panels directly. Ideal for temporary setups or rented spaces, it simplifies installation: just glue your foam panel onto the provided board and hang it securely from screws on your wall or ceiling.

Disclaimer

- Each box contains 5 FixArt Foam and 1 tube of GlueArt, that install 5 panels (panel size 595x595 mm)
- This system is compatible with flat foam panels (Agad, Thor, Myron E, etc.)
